w07-p1: Test css and js for w07_31.html

932261d hang0727

Thu Oct 24 18:52:30 2024 +0800 w07-p1: Test css and js for w07_31.html

The image is a composite of two screenshots. The left screenshot shows a VS Code editor with a file explorer on the left and a code editor in the center. The code editor displays a CSS file named 'style_31.css' with the following content:

```

log_31 > > style_31.css > {} @media screen and (min-width: 800px)
76 .blog-content a {
77
78
79
80
81
82 @media screen and (min-width: 550px) {
83 .blogs .blogs-center {
84   grid-template-columns: 1fr 1fr;
85 }
86 }
87
88 @media screen and (min-width: 800px) {
89 .blogs .blogs-center {
90   grid-template-columns: 1fr 1fr 1fr;
91 }
92 }
93
94 @media screen and (min-width: 1100px) {
95 .blogs .blogs-center {
96   grid-template-columns: repeat(4,
97     1fr);
98 }
99
100 @media screen and (min-width: 1300px) {
101 .blogs .blogs-center {
102   grid-template-columns: repeat(5,
103     1fr);
104 }
105
106 @media screen and (min-width: 1600px) {
107 .blogs .blogs-center {
108   grid-template-columns: repeat(6,
109     1fr);
110 }
111

```

The right screenshot shows a Google Chrome browser window displaying a web page titled 'Blog_31 Demo'. The page shows a grid of blog cards. The browser's DevTools are open, showing the 'Elements' panel on the right. The HTML structure is as follows:

```

<!DOCTYPE html>
<html lang="en">
<head></head>
<body>
  <section class="blogs">
    <div class="section-title"></div>
    <div class="blogs-center"></div>
  </section>
  <script></script>
</body>
</html>

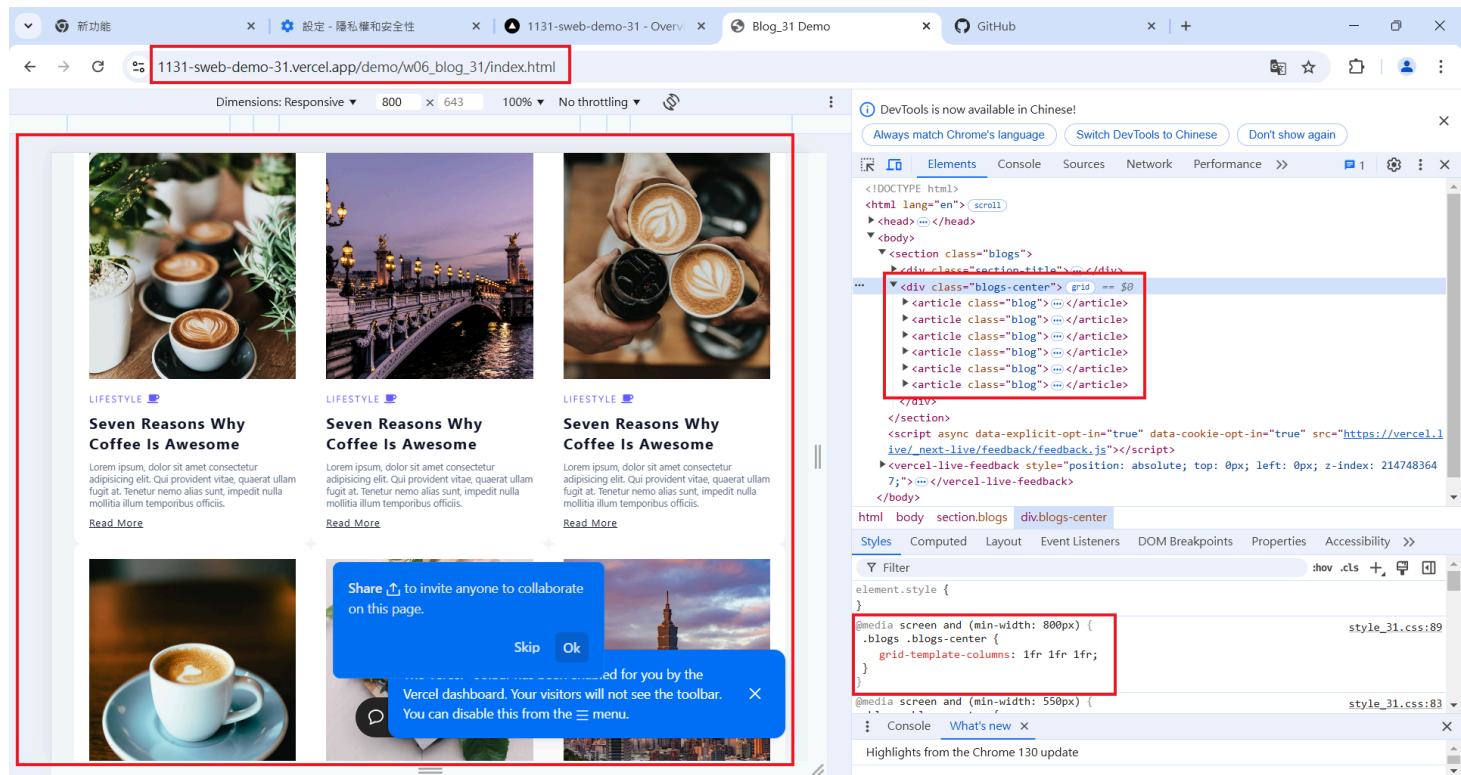

```

Red boxes highlight the CSS rules in the VS Code editor and the corresponding HTML elements in the browser's DevTools. The browser window also shows the 'Dimensions' panel with a width of 1378 and a height of 1623. The 'DevTools' panel shows the 'Elements' tab selected, and the 'Styles' panel shows the 'element.style' rule selected.

Thu Oct 24 19:20:11 2024 +0800 w07-p2: Redo w06-p4 with different break

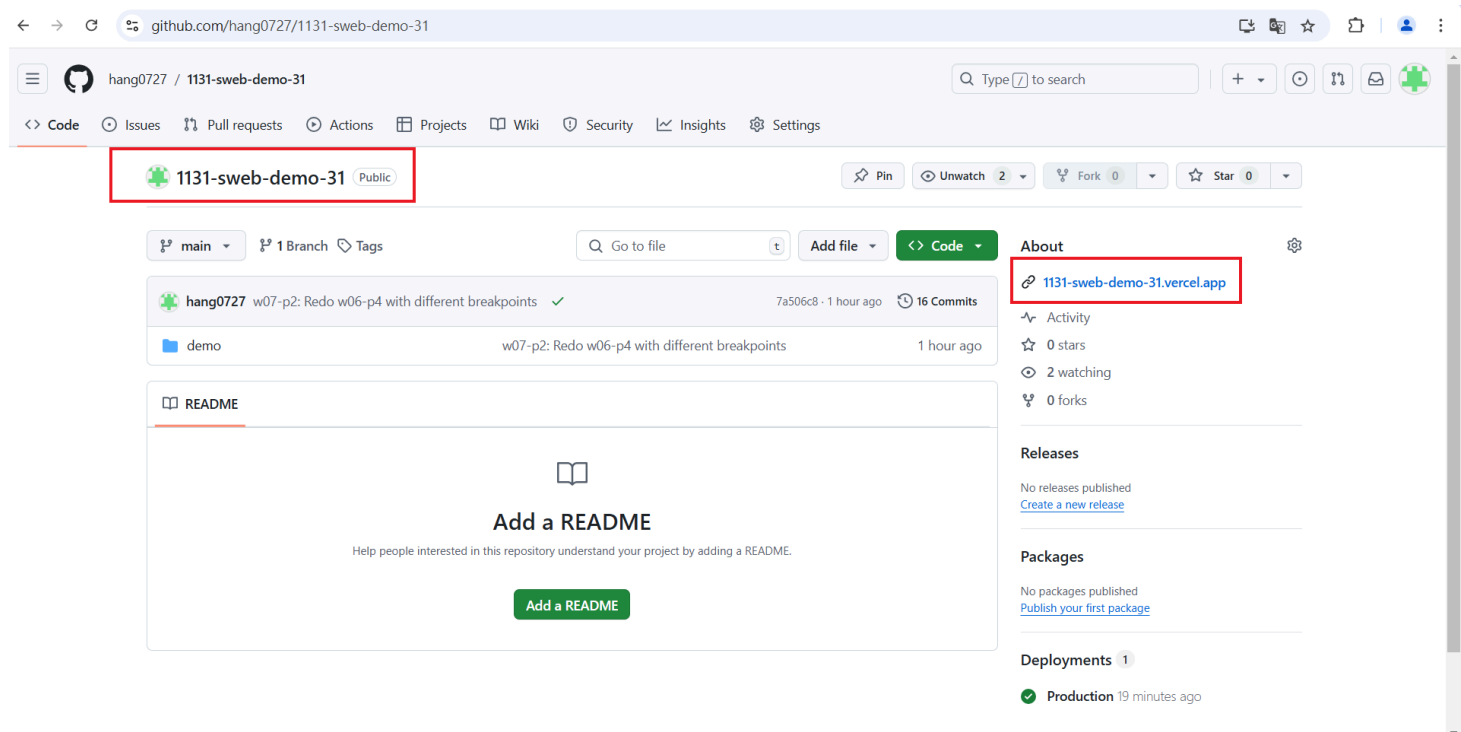

w07-p3: Connect your Github repo to Vercel and have a root home page to class demo navigation

=> In Vercel, show w06 blogs demo

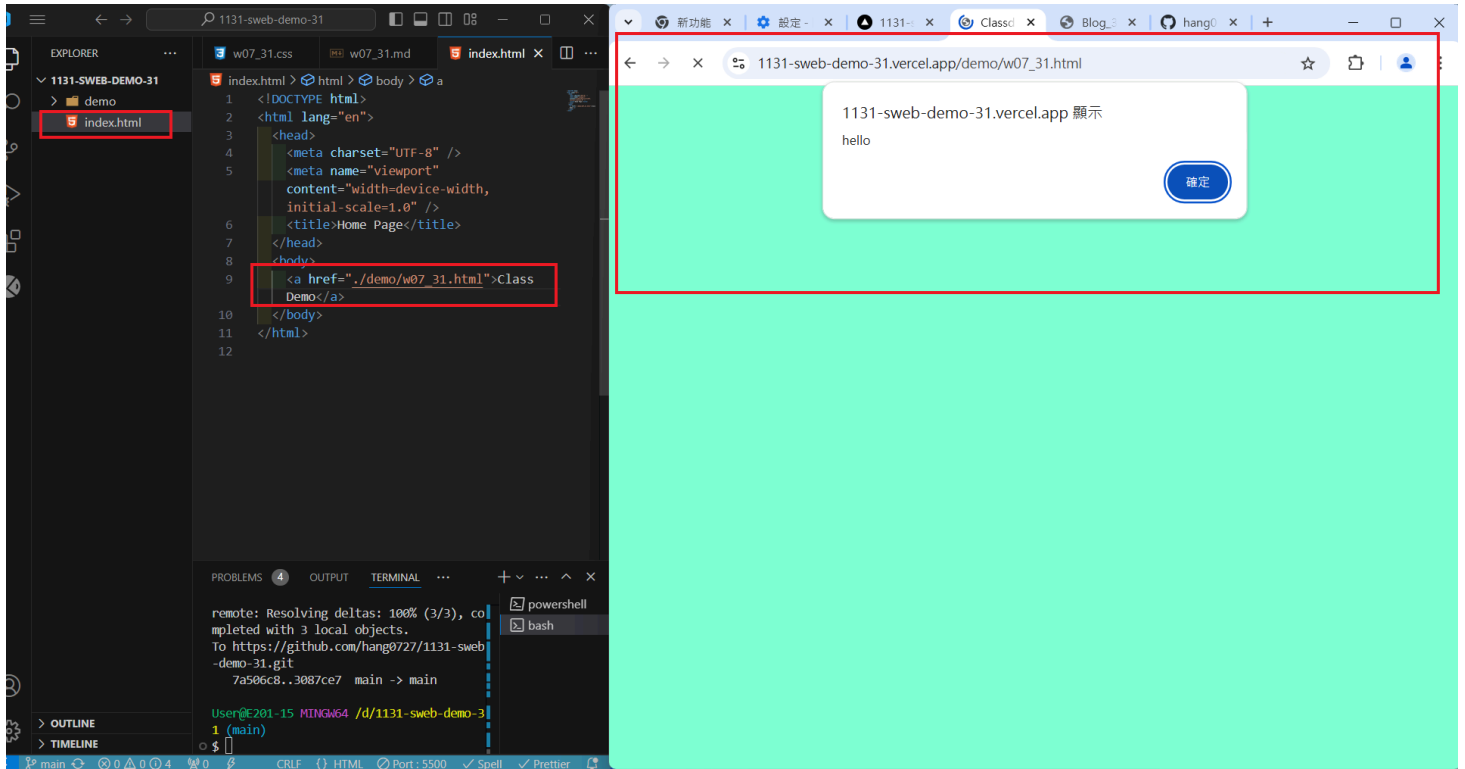

=> Show your Github repo with Vercel URL

My Vercel URL

=> create index.html as root home page and have a link to class demo navigation as done in w07
